Subject: San Jacinto South Impoundment Field Investigations

---

Gary – I wanted to let you know that we plan to mobilize to San Jacinto to begin the field investigations for Groundwater, Soil and Sediment SAP addenda on April 30. I believe we will start with the groundwater well in the Harris County right-of-way, and possibly the sediment sampling on the first day. The other groundwater and soil work will continue from there under our current plan.

If EPA or any other agency folks will be coming to observe any of this work, they will need to review and comply with the HASP and HASP addenda for these activities. That could involve potential Level C personal protective equipment if real time monitoring indicates a condition that requires that level of protection.

Please let us know if anyone from EPA, or other agencies will be at the site to oversee this sampling.

Thanks,  
David
